

Cap for post

Griplast has developed post covers especially for arboriculture. This gives **effective protection against the rubbing of nets** (anti-hailstone, anti-bird, etc.) on the posts.

This solution, which is comparable to plastic caps, is **quicker and easier** to install.

Simply place the protection sleeve on the bracket; we advise you to tape up the bottom so that it lasts longer.

Technical data:

- Top quality polyethylene
- UV resistance
- Thickness of 300 microns (300 µm)

Reference	Flat width in cm	Height in cm	Colour
150x400	15	40	Grey
240x400	24	40	
240x800	24	80
