

## Dual protection vine shelter

---

Griplast provides a **simple and suitable solution for the protection of vines** against both rodents and herbicide.

This dual protection is provided by both the full lower section of the sleeve which **protects against chemical weeding** and the upper meshed section which **protects against rabbits and hares**.

The open top also facilitates the **ventilation of the plant** and encourages its **rapid growth** through the greenhouse effect.

The GRIPLAST dual protection vine shelter is made with **four reinforcement strips** which accentuate the rigidity of the product and keep it open.

### Technical data:

- Top quality polyethylene
- **UV resistance**
- Reinforcement strips

The professional protection for plantations

Dimensions in cm	Diameter in mm	Colour	Weight in g / ml
40	125-130	Green, <b>brown</b> , blue	80 / <b>140</b> / 160
50	125-130	Green, <b>brown</b> , blue	80 / <b>140</b> / 160
60	125-130	Green, <b>brown</b> , blue	80 / <b>140</b> / 160
