

Simple vine shelter

The GRIPLAST “full” vine shelters were specially designed to protect the **vines or fruit trees against herbicide treatments**.

It is a **simple, economical and rapid solution**.

Several finishes are available:

- Classic
- Micro perforated
- Macro perforated

Technical data:

- Top quality polyethylene
- UV resistance

Dimensions in cm	Diameter in cm	Thickness in μm	Colour
30	14	100 à 300	Khaki green, brown, transparent, etc.
40	14	100 à 300	
50	14	100 à 300	

The thickness we recommend is 160 microns (160 microns).

The vine shelter should ideally be installed using bamboo canes or metallic stakes for rocky ground.
