

Tree shelter StopLièvre GP®

Anti-Rabbit mesh

A shelter with diamond meshes, ideal for protecting young plants against attack by rodents and rabbits or hares.

This deterrent system is mainly effective for fruit trees and small shrubs.

It is an **economical protection** thanks to its low weight and its highly aerated structure.

Technical data:

- Made of polyolefin providing the best compromise between rigidity and flexibility to avoid damaging the tree during its growth.
- Diamond mesh 8 x 8 mm
- Anti-Uv allowing a life exceeding 36 months
- Recyclable

The professional protection for plantations

Diameter in cm	Weight in g / ml	Height in cm
14	40	40, 50 and 60
24	70	
30	70	

The installation of the shelter StopLièvre GP[®] is recommended using two bamboo or metal stakes on rocky soils.
